## **DETAILED ACTION**

### ***Election/Restrictions***

1. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In order for all inventions to be examined, the appropriate additional examination fees must be paid.

Group [ I ], claim(s) 1-9, drawn to a photodetector MOSFET device.

Group [ II ], claim(s) 10-16, drawn to a method of making a photodetector MOSFET device.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The claims of Group I drawn to the device describe a plastic sheathing enclosed by a protective sleeve. The claims of Group II can be made by another materially different process such as depositing the metal layers before forming the contacts and then etching the metal layers on the source and drain.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
